# DMR MODE

.

1. Simplex = DMR Tier I   (TX/RX on both slots at same time)

2. Repeater = DMR Tier II   (TX/RX on Slot 1 or Slot 2)

3. Double Slot = Simplex DMR Tier II   (TX/RX on Slot 1 or Slot 2)

For Ham Radio DMR Simplex Frequencies, we would use – Simplex = No1
UK Simplex Frequencies Link

For Ham Radio DMR Repeaters, we would use Split Frequencies – Repeater = No2

For Ham Radio doing events we would use Double Slot. = No3
This lets us have two channels on the same Frequency. Slot 1 and Slot 2

Business users on Simplex Frequencies, you should use – Double Slot = No3
This lets us have two channels on the same Frequency. Slot 1 and Slot 2
